

## A TRIBUTE

**Any new insights in this text owe much to the pioneering work of the late Professor A. E. Wilder Smith who passed from us in September 1995. His three earned doctorates in Organic Chemistry and related fields along with his 70 scientific papers and 30 books in 17 languages, plus his brilliantly presented Huxley Memorial Lecture at Cambridge University England on the evidence for Creation, have inspired many. We have stood on his shoulders to see a little further.**

### ABOUT THE AUTHORS

**John Mackay** was for many years a science teacher in both state and private education systems in Queensland. He also lectured in Geology at Tertiary level for Technical Education. He has done research in USA, UK, Europe, The Caribbean, New Zealand, Australia, Pacific Islands and Asia on the origin of life. His Geology degree was obtained from the university of Queensland.

**Diane Eager** lectures in Medical Biology for Canberra University Australia. She has long been concerned that students be allowed the freedom to see all data relating to the origin of life. Her Medical degree was obtained from the University of NSW.

**SPECIAL THANKS** to all who critically reviewed the Text and Workbook, such as Prof Jeff Boles, Dr. Tom Guilliams, Prof. Nigel Lee, Prof. Gary Chiang, Dr Tom Hayward, Peter Jones, and Rev Donald Dadd. They have been of great assistance in suggesting improvement, spotting errors and encouraging completion. Any remaining mistakes are ours. Thanks to typists Mrs Sylvia Jones, Mrs Linda Carman and Mrs Bethwyn Corbett who made the Text a reality, along with Dr Diane Eager whose task it was to turn my rough teaching notes into the first semblances of a text. Without her co-authorship and input of biological data, this text would not have been readable. Special thanks to my wife Anne who spent many early mornings on the computer to complete this project.
